

GoudmetHout - Staining instruction

How can you conveniently stain the Smart Balcony Table?

TIP! Make long strokes so the stain is well distributed & don't put too much stain on the sponge cloth at a time

NOTE: It is not an opaque stain, so you will continue to see the wood grains

1. Dust the balcony table (with a broom or dry cloth)
2. Put a glove over the hand with which you stain
3. Put $\frac{1}{4}$ of the can of stain in the container
4. Wipe the stain with the sponge cloth or brush over the table
5. Let the stain dry for 3 hours
6. Repeat steps 2 to 5 again
7. Ready to use!
